+91 93487 96519 | srinivasa.dumpa@proton.me | <https://linkedin.com/in/srinivasadumpa>

Security Analyst with 4+ years of experience in SOC operations, incident response, threat hunting, and digital forensics. Hands-on experience with SIEM, EDR, threat intelligence, and security automation, with a strong focus on detection engineering, incident response, and improving security operations. Focused on solving complex security challenges and improving the effectiveness of day-to-day security operations.

CORE COMPETENCIES

- Security Operations
- Incident Response
- Threat Hunting
- Email Security
- Digital Forensics
- Cloud Security Monitoring
- SOC Metrics Optimization
- Threat Intelligence
- Detection Engineering
- Use Case Optimization
- Security Automation
- Playbook Development
- False Positive Reduction
- EDR/XDR Monitoring
- Vulnerability Management
- Incident Coordination
- Security Training & Mentoring

EXPERIENCE

Senior Security Operations Engineer

February 2025 – Present

Qualys Security Tech Services, Pune, Maharashtra, India

- Reviewed and investigated 300+ security alerts every week across SIEM, EDR, email, and cloud platforms, escalating incidents based on severity and business impact.
- Managed security incidents from initial analysis through containment and closure, documenting findings and working with stakeholders until remediation.
- Worked with Corporate IT, DevOps, and Cloud teams during investigations to validate suspicious activity, identify root causes, and resolve security issues.
- Reviewed and fine-tuned 75+ detection use cases in collaboration with SIEM team, reducing unnecessary alerts and improving the quality of security detections.
- Helped reduce false positives by ~25% by refining detection logic, removing noisy rules, and improving event correlation.
- Performed regular threat hunting using threat intelligence, IOCs, and endpoint telemetry to identify suspicious activity that had not been detected by existing alerts.
- Reviewed newly published CVEs, identified affected systems, and worked with respective teams to complete remediation through patching and configuration changes.
- Helped improve SOC KPIs, maintaining MTTA within ~10–15 minutes and reducing MTTR to within SLA targets, by improving alert prioritization and escalation workflows.
- Deployed Qualys FIM, EDR, and EPP across 50+ SCP pods and more than 100 endpoints, improving endpoint visibility.
- Created and updated around 40+ playbooks, making incident handling more consistent and reducing the time required to investigate common alerts.
- Supported junior analysts by reviewing investigations, answering technical questions, and helping them develop a structured approach to alert triage.
- Conducted internal knowledge-sharing sessions on evidence collection, artifact analysis, and investigation techniques to strengthen the team's Digital Forensics and Incident Response capabilities.
- Supported audit and compliance activities by maintaining investigation records, security logs, and evidence required during internal and external audits.
- Integrated security benchmarking data into internal dashboards, giving leadership better visibility into organizational security posture and risk trends.

Digital Forensic Examiner

June 2024 – January 2025

Center for Cybercrime Studies, New York, NY, United States

- Conducted IoT forensic research, analyzing device security and network behavior to support digital investigations.
- Assisted in developing network reconnaissance and vulnerability scanning tools using Python.
- Built and maintained IoT forensics lab, ensuring best practices, legal compliance, and thorough documentation.

IT Engineer

September 2022 – January 2025

CUNY – John Jay College of Criminal Justice, New York, NY, United States

- Managed Linux laboratory, ensuring smooth operation and resolving student technical issues.
- Designed and implemented a digital forensics lab, including installation, maintenance of forensic software applications.
- Integrated logs from a local Linux server into the Splunk SIEM platform to enhance visibility and usability.
- Provided technical support to students in applied cryptography, computer networks, python, and on cyber security projects.
- Assisted professors with troubleshooting and maintaining laboratory systems.
- Facilitate workshops and support sessions, enhancing students' practical skills in cybersecurity tools and methodologies.

Security Operations Engineer

August 2021 – July 2022

Qualys Security Tech Services, Pune, Maharashtra, India

- Investigated security incidents, analyzed affected systems, and worked with internal teams to contain threats and restore normal operations.
- Coordinated with OEM vendors to troubleshoot product issues, resolve security incidents, and support day-to-day security operations.
- Monitored malware activity and APT campaigns in the Qualys environment and carried out bi-weekly threat hunting to identify suspicious behavior.
- Investigated phishing emails and malware samples using sandbox environments to determine malicious behavior and recommend appropriate response actions.
- Reviewed and updated investigation runbooks with the team lead to improve incident response documentation.
- Helped develop tabletop exercises to improve incident response readiness and coordination across different teams.
- Improved SOC alert quality through log analysis and detection tuning, reducing false positives by 40%.
- Built a Python script to parse Qualys VMDR scan results, automating vulnerability data extraction and simplifying security reporting.
- Created security alerts and dashboards to improve threat visibility and help analysts identify security incidents quickly.

SKILLS

- **Endpoint Security** – Qualys EDR, Microsoft Defender for Endpoint, Trend Micro
- **Threat Intel & Hunting** – Cisco Talos, MISP, OpenCTI, VirusTotal, AbuseIPDB, Shodan, IBM X-Force Exchange
- **Digital Forensics** – FTK, Encase, Volatility, Autopsy, Cellebrite, Oxygen Forensics, BelkaSoft Evidence Center X
- **SIEM & Automation** – Splunk, Elastic Security, Wazuh, Securaa SOAR
- **Email & Identity Security** – Proofpoint Admin, Proofpoint TAP, Microsoft Defender for O365, Okta, Cisco Duo
- **Tools** – Wireshark, Nessus, Sysinternals, Qualys VMDR, Cloudflare Magic Transit, CyberArk EPM, Iru, Cisco Umbrella
- **Frameworks** -MITRE ATT&CK, NIST

CERTIFICATIONS

- SailPoint Identity Security Leader
- AWS Certified Cloud Practitioner
- Certified in Cybersecurity by ISC2
- Google Cyber Security
- Network Security Associate (NSE 1 & NSE 2)
- Cyber Security Essentials by CISCO
- Qualys Certified (Vulnerability Management Detection & Response, Endpoint Detection and Response, Cloud Agent)

EDUCATION

CUNY – John Jay College of Criminal Justice, New York, NY, United States

2022 – 2024

- Master's in Digital Forensics and Cyber Security - 4.0 GPA

International Institute of Digital Technologies, Tirupati, Andhra Pradesh, India

2020 - 2021

- Post Graduation in Cyber Security – 91.9%

Anil Neerukonda Institute of Technology and Sciences, Visakhapatnam, Andhra Pradesh, India

2016 - 2020

- Bachelor's in Information Technology - 9.33 GPA
